Implemented

Lockstep Education and BridgeTek Solutions support the vital work of educators to develop skilled and prepared students by providing a modern classroom that is cutting edge, safer & more secure, and powered by the latest technologies that promote student success. We do this first by understanding our clients' most aspirational goals. Then, we take a consultative approach to planning, developing, and implementing enterprise-class technology services.

## Our Expertise

Proven track record of delivering success in SLED markets with industry-leading technical expertise.

Experienced with SLED funding and procurement process, making us a true partner for compliance, ease of purchase, and competitive pricing.

Robust industry certifications and a technology vendor network of over 100 partners.

# Our World

## Safety

Mitigate emergency situations by integrating solutions that deter school violence and secure facilities. Connect staff, classrooms and emergency responders (when necessary) on a common day-to-day communication platform.

## Audio/Video

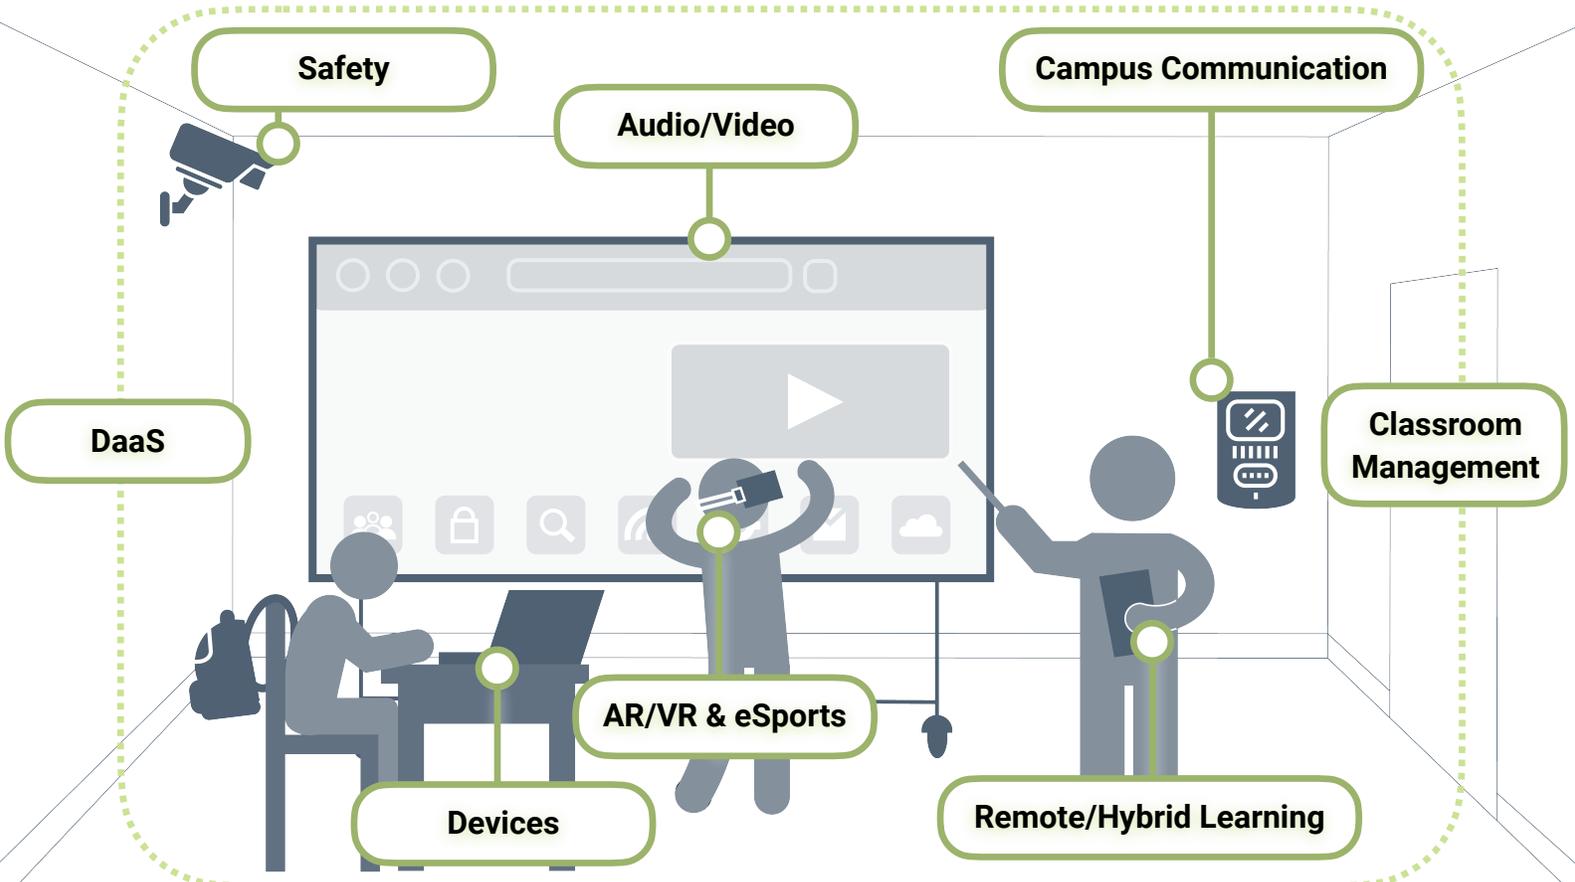

Bring learning to life with audiovisual education solutions that put a world of knowledge in the classroom. With interactive whiteboards, sound, and video, our classrooms and conference rooms are designed to support modern learning.

## Campus Communication

Keep students and staff safe and informed with network-based solutions for intercom, paging, bells, mass notification, classroom audio, lesson sharing, and AV management.

## Classroom Management

Maintain control of the learning environment with tools that can set parameters on website access, monitor student activity, and provide alerts and insights for ensuring a safe, productive classroom.

## DaaS

Streamline device management with a turnkey solution designed to relieve teachers and staff of administrative tasks. This “White Glove” service provides comprehensive provisioning, services and ongoing repair support for one integrated experience.

## Devices

Empower students with reliable devices that keep them connected to the classroom, enabling them to navigate course material and other key school activities.

## AR/VR & eSports

Motivate students academically and provide scholarship opportunities with a comprehensive, customized eSports program. Provide innovation in education with immersive technologies that connect students, teachers, inventors, and creators.

## Remote/Hybrid Learning

Embrace technology to enable real-time hybrid education from the classroom, without complicating teacher workflows. Thrive in hybrid, remote, or in-classroom teaching and learning environments with the right tools, platforms, and components.
